

HealthConnect Week 7 Testing & Validation Record

Data Analytics Track | HealthConnect Appointment Analytics

Testing focus: KPI consistency and dashboard slicer behaviour

Component Tested	Test / Scenario	Expected Result	Actual Result	Pass / Fail	Issue Identified	Action Taken	Retest Result	Evidence
KPI consistency	Check main KPI values with no filters applied	Dashboard should display the established baseline values	No-show 51.2%; Cancellation 5.3%; Reminder coverage 72.7%; Repeat no-show 57.8%	Pass	None	No correction required	Values remained consistent	Screenshot: 01_Overview_No_Filter.png
Year-Month slicer	Filter dashboard to April, then clear the filter	KPI cards and visuals should update for April, then return to baseline values after clearing	Visuals updated when April was selected; original KPI values returned after clearing the slicer	Pass	None	No correction required	Passed - dashboard returned to baseline after clearing	Screenshot: 02_Overview_April_Filter.png
Appointment Type slicer	Filter dashboard to General Consultation, then clear the filter	KPI cards and visuals should update for General Consultation, then return to baseline values after clearing	Visuals updated when General Consultation was selected; original KPI values returned after clearing the slicer	Pass	None	No correction required	Passed - dashboard returned to baseline after clearing	Screenshot: 03_Overview_General_Consultation_Filter.png

HealthConnect Week 7 Testing & Validation Record

Data Analytics Track | HealthConnect Appointment Analytics

Dashboard refinement	Add "Validated Key Findings" text box and confirm dashboard still functions	Dashboard should remain fully functional after refinement	Text box added successfully; April and General Consultation filters still worked correctly	Pass	None	Added summary text box to improve usability and interpretation	April retest passed; General Consultation retest passed	Screenshots: 04_Dashboard_Refinement.png 05_April_Retest.png 06_General_Consultation_Retest.png
----------------------	---	---	--	------	------	--	---	--

Validation note: No issues were identified in these three tests.
